Every precaution is taken to produce clean, true to name bulbs. Any bulbs that prove not true to name will be gladly replaced. There will be no substitution of variety without permission.

## GLADIOLUS CULTURE

**PLANTING**—Gladiolus can be planted at about the time leaves on trees are starting to show green, up to the middle of June. I like early planting best.

**SOILS**—They can be planted in any good garden soil that has been plowed or spaded to the depth of 8 or 10 inches.

**PLANTING DISTANCE**—If planted in rows, space rows from 18 to 30 inches apart. Opening a trench to the depth of about 6 inches and make an application of your favorite complete fertilizer. Use about 4 lbs. to 100 feet of row, then work well into the soil, so the bulb will not come in contact with the raw fertilizer. Set the bulbs top up 4 or 5 inches apart and in sandy soil 5 or 6 inches deep. In clay soil do not plant so deep.

**SUMMER CARE**—Cultivate the soil frequently throughout the summer, to keep down the weeds. Water when necessary by soaking the soil thoroughly. Deep watering stimulates healthy root action.

**CUTTING**—In cutting the blooms leave at least 4 leaves on the plant to mature the bulb.

**DIGGING**—Dig the bulbs carefully when the foliage is turning brown, but always before hard freezing weather. Cut the stems off close to the bulb, and dry the bulbs in a frost proof airy shed for about three weeks, then the old mother bulb can be removed, leaving a clean new bulb or bulbs.

**STORAGE**—Store in a frost proof cellar. A temperature of about 40 degrees is best. Place in shallow trays, and the different varieties can be placed loosely in thin cloth bags. Tie and label as to name of variety.

# GREETINGS

Dear Friends: We are all waiting and hoping that Peace may come to our troubled world, but while we wait, let us try to keep this country beautiful for the children who are growing up here and for our boys when they come home.

The people in the U. S. are the most fortunate people in the world today. If we keep busy at something it will be helping to win the war.

I see that they are asking us to grow more Victory Gardens, and to produce at least 25% more food in 1944 than last year. WE CAN DO IT.

Last summer I worked more hours each day, in the garden than ever before, and my health was never better. When we are busy with our fruit, vegetables and flowers we forget to worry, and we know we are helping.

Don't forget to write to those in the service, who are near and dear to us. Sometimes they are where they can not write, but keep your letters going, they will reach them sometime, and you will hear from them.

With best wishes to all of you,

Sincerely,

MRS. GEORGE KINYON.
